FILE 7: interview_guide.pdf

Description: Semi-structured interview guide used for 25 key informants (construction professionals, real estate developers, blockchain experts, policymakers, modular manufacturers, housing beneficiaries). The guide contains open-ended questions organised into four themes. Interviews lasted 15–25 minutes and were audio-recorded (with consent) and transcribed verbatim.

INTERVIEW GUIDE FOR KEY INFORMANTS

Voluntary Participation Statement (same as in File 5)

Theme 1: Financial Constraints and Investment Barriers

1. What are the biggest financial constraints to implementing modular construction in Ghana?
2. How does access to finance affect adoption of innovative construction technologies?
3. What role should government play in subsidising or guaranteeing investment in modular construction?
4. Have you observed any innovative financing mechanisms (e.g., public-private partnerships) being used or considered?
5. How do banks and financial institutions perceive modular construction projects?

Theme 2: Knowledge, Skills, and Capacity Building

6. What is the current level of awareness and understanding of modular construction among professionals?
7. What training programmes exist for modular construction and blockchain technology?
8. How can academic-industry partnerships bridge the knowledge-practice gap?
9. What skills are most lacking in the current workforce?
10. How does the knowledge deficit affect adoption decisions?

Theme 3: Policy, Regulatory, and Institutional Factors

11. What policies or regulations currently exist that mandate or encourage modular construction?
12. How effectively are these policies enforced? What are the main challenges?
13. What regulatory reforms are needed to support modular construction adoption?
14. How do fragmented institutional responsibilities affect implementation?
15. Have you observed any instances where planned modular projects were abandoned? What were the reasons?

Theme 4: Blockchain Integration and Transformative Potential

16. How familiar are you with blockchain technology and its applications in construction?
17. What are the potential benefits of integrating blockchain with modular construction?
18. What are the main obstacles to blockchain adoption in Ghana's construction industry?

19. Can you describe any successful blockchain or modular construction projects in Ghana?
20. If you had additional resources, what would be your top three priorities for improving adoption?
21. How could blockchain-enabled modular construction reduce housing inequality?
22. What role should government play in promoting these technologies?
23. How can stakeholder collaboration be improved?
24. What are the risks of not adopting these technologies?
25. Is there anything else you would like to add?

Interviewer Closing Protocol: Reassurances about confidentiality; thanks for participation.
